

Advanced Programming
Season 2024-III
Workshop No. 3 — Conceptual Design

Eng. Carlos Andrés Sierra, M.Sc.
Computer Engineering
Universidad Distrital Francisco José de Caldas

The *project design* is almost ready. You make a great job understanding **requirements** and making **first technical designs**. Now to conclude, you will have a couple of additional things to do.

Based on the *requirements* you know, and *previous specifications*, please make:

1. **Web GUI Mockups** (*any tools* and *color pallete* you want). Define why the color selection and any additional considerations or questions you would like to ask to the client.
2. Define what **web services** do you need to create in the **backend** using next structure: **Name, Endpoint, HTTP Method, Inputs, and Outputs**.

In this way, you will complete the design of the product, including the way to connect front-end and back-end.

Deadline: **Monday, February 10, 2022, 12:00**

Carlos Andrés Sierra, Computer Engineer, M.Sc. on Computer Engineering, Titular Professor at Universidad Distrital Francisco José de Caldas.
