UNIVERSIDAD DISTRITAL
FRANCISCO JOSÉ DE CALDAS

Outline

Data Control Language (DCL)

DCL (*Data Control Language*) is a **subset** of **SQL** that is used to **create**, **modify**, and **delete database users**.

PostgreSQL Example

```
CREATE USER myUser WITH PASSWORD 'myPassword';
```

```
UPDATE myUser SET password = 'newPassword'  
WHERE username = 'myUser';
```

```
DROP USER myUser;
```

Data Control Language (DCL)

MySQL Example

```
CREATE USER myUser IDENTIFIED BY 'myPassword';
```

```
SET PASSWORD FOR myUser = 'newPassword';
```

```
DROP USER myUser;
```

Data Control Language (DCL)

DCL (*Data Control Language*) is a **subset** of **SQL** that is used to **control** the **access** to the **database**.

PostgreSQL — MySQL Example

```
GRANT SELECT, INSERT, UPDATE, DELETE  
ON myTable TO myUser;
```

```
REVOKE SELECT, INSERT, UPDATE, DELETE  
ON myTable FROM myUser;
```

Outline
